Conger eel please.

 In sushi restaurants

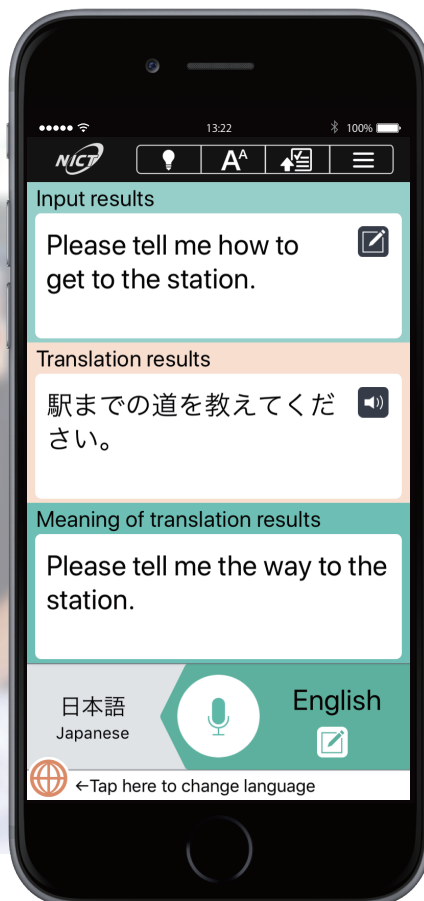

Best-suited for
travel-related
conversations

What time is check-in?

 In hotels

I have a slight fever.

 In hospitals

Communicate with the world using "VoiceTra"!

VoiceTra is an easy-to-use speech translation app that translates your spoken words into different languages. You can easily check whether what you have input is being delivered with the intended meaning.

This application utilizes speech recognition, machine translation, and speech synthesis technologies developed by the National Institute of Information and Communications Technology (NICT).

VoiceTra translates your spoken words into different languages.

Download and use for free

Data communication via the Internet is required to use the app and users are responsible for the fees incurred. Please note that the telecommunication fees can be expensive when roaming outside of Japan.

◆ User-friendly

Simple and easy to use.
Help messages will also assist you
on how to use the app.

◆ Check the translation results

The translation results are translated back into your own language and will be displayed at the bottom as "Reverse translation". This allows you to check whether what you have input is being delivered with the intended meaning.
