Multilingual Speech Translation App
VoiceTra®
Translate your spoken words into 31 different languages!

Do you have this in a different size?

In shops

What time does the next train depart?

In stations

Conger eel, please.

In sushi restaurants

What time is check-in?

In hotels

I have a slight fever.

In hospitals

The World is a Word Away!

VoiceTra is an easy-to-use multilingual speech translation app that translates your spoken words into different languages. You can easily check whether what you have input is being delivered with the intended meaning.

This app utilizes speech recognition, machine translation, and speech synthesis technologies developed by the National Institute of Information and Communications Technology (NICT).

How to Download
Scan the appropriate QR Code on the right or follow the link on the VoiceTra Support Page.  @https://voicetra.nict.go.jp/en/

* Please make sure you are installing the right app.

Supported OS : iOS, Android

* Operation is not guaranteed for all devices running on the above OS versions.
**VoiceTra** translates your spoken words into different languages.

**Download and use for free.**

*Data communication via the Internet is required to use the app and users are responsible for the fees incurred. Please note that the telecommunication fees can be expensive when roaming outside of Japan.*

---
